STATE OF ILLINOIS DEPARTMENT OF TRANSPORTATION

BAR SPLICER ASSEMBLY ALTERNATIVES

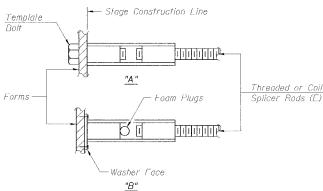

WELDED SECTIONS

** Heavy Hex Nuts conforming to ASTM A 563, Grade C, D or DH may be used.

	Ва	r S	plicer	ſ01	- #5	5 bar		
Min.	Capacity	=	23.0	kip	s -	tensi	on	
Min.	Pull-out	St	rength	-	9.2	kips	-	tension
No.	Required		64					

DESIGNED	L.E.L.

INSTALLATION AND SETTING METHODS

"A" : Set bar splicer assembly by means of a template bolt. "B": Set bar splicer assembly by nailing to wood forms or cementing to steel forms. (E): Indicates epoxy coating.

NOTES

Bar splicer assemblies shall be of an approved type and shall develop in tension at least

Other systems of similar design may be submitted to the Engineer for approval. Approval shall be based on certified test results from an approved testing laboratory that the proposed

fs_{allow} = Allowable tensile stress in lapped reinforcement bars in ksi (Service Load)

Splicer rods shall be of minimum 60 ksi yield strength, threaded or coiled full length.

All reinforcement bars shall be lapped and fied to the splicer rods or dowel bars.

Bar splicer assemblies shall be epoxy coated according to the requirements for

(lension in kips)

Minimum *Pull-oul Strength = 1.25 x fs_{allow} x A_f

Where fy = Yield strength of lapped reinforcement bars in ksi.

125 percent of the yield strength of the lapped reinforcement bars.

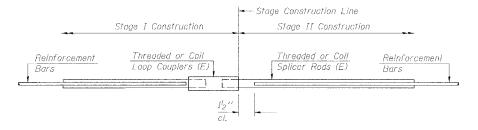

bar splicer assembly satisfies the following requirements:

(Tension in kips)

reinforcement bars.

2

except as noted. The furnishing and installation of bar splicer assemblies will be measured and paid for at the contract unit price each for "BAR SPLICERS".
